

**Street Light Improvement District (SLID) Cost Estimate:**

*Please note that the information provided below is based on average costs experienced by the City of Surprise as billed by Arizona Public Service (APS). Each street light has a different pole height, pole type, mast arm, and lamina that causes the actual cost to vary from one SLID to another. **This is only an estimate.** The actual cost for this SLID may be higher or lower than estimated below. The intent of this information statement is to provide the owner with a rough estimate of what the operation of the SLID will cost. Due to the timing of when the SLID commences operation and when the first tax levy may be placed on tax bills, the first tax bill received may cover a period of more than 12 month's operations of the SLID. This estimate does not attempt to estimate the impact of any future electricity rate increases.*

Name of development: **Desert Oasis Parcel 14B**

Number of street lights: 21

Total SLID estimated average cost for twelve months: **\$5,850**

Number of parcels within the SLID boundary: 77
